IMLT(ISEKI Machine Link Terminal) monitor

For driving, working, engine and maintenance, various functions such as autobrake, AT shift, backup, and memory accelerator can be easily set up on a single monitor, and the information required for the tractor can be found on the monitor.

Escort light

Even after turning off the engine, the work lamp is maintained for approximately 30 seconds to help ensure safe disembarkation during night work.

3-Point hitch with increased lift-capacity

Take advantage of the increased lift-capacity and control the RPM of the implement with the PTO lever to carry out difficult jobs like rotary tilling and weeding.

Ergonomic interiors for operator comfort

The main control panel, designed specifically for driver comfort and productivity, makes combine operation effortless with key controls within fingers' reach. The digital instrument panel provides notifications and diagnostic information at a glance. Spacious seats and the flat floor with rubber mats, allow entry and exit from the operator cabin safe, comfortable and simple.

Electro-hydraulic hitch control system

This tractor comes equipped with an electro-hydraulic control (EHC) system for the rear hitch, leveraging German engineering from Bosch. The system allows for quicker and more accurate responses to changes in power and position, enabling operators to lift and lower the hitch gear to exacting specifications. The system is especially useful for row crop farming, allowing more precise tillage and boosting the quality of harvest.

Power steering with hydraulic tilt for optimal ergonomics

The power steering of this tractor comes with a tilt function, allowing operators to move the steering vertically to find the ideal position. This facilitates easier turning and minimizes fatigue, in addition to adjustable suspension seating and the hydraulic axle configuration.
